# ABWAX® Rhus Pearls

## Features

INCI	Rhus Succedanea Fruit Cera
APPEARANCE	Solid in pearls
COLOR	White to pale yellow
ODOR	Characteristic
DROP POINT (°C)	49-56

- TEXTURIZING PROPERTIES
- SMOOTHNESS IMPROVING AGENT
- 100% PLANT-DERIVED WAX
- HIGH STABILITY TO TEMPERATURE VARIATIONS
- LOW-MELTING POINT

## Background

The ABWAX® VIRIDIS line is a line of waxes for cosmetic applications developed to create **sustainable alternatives to classic natural waxes**.

ABWAX® RHUS WAX PEARLS comes from sustainable and renewable resources through an ethical and transparent supply chain; in particular ABWAX® RHUS WAX PEARLS derives from a plant of Asian origin, thus applying the concept of using **100% of the available resources**.

## General information

ABWAX® RHUS PEARLS is a wax of **vegetable origin** characterized by a **low melting point**: the data show a range between 49 and 56° C.

It is also very stable to temperature variations, having a moderate oil crosslinking capacity.

All these points allow for anhydrous stick systems, for example, the creation of **unique performances** by combining ABWAX® RHUS WAX PEARLS with other waxes: as internal tests have shown, this combination **increases the smoothness** and yield of the finished product.

Easy to use in its pearl form, ABWAX® RHUS WAX PEARLS works in combination with all common cosmetic ingredients, **improving the finish and texture** as well as the smoothness of the product.

ABWAX® RHUS WAX PEARLS is also exempt from REACH registration, thanks to its completely natural components. ABWAX® RHUS PEARLS has been tested in different types of cosmetic formulations.
