

ABWAX[®] Rhus Berry

Sustainable wax of plant origin

Excellent **oil release capacity**, which allows for a **soft finish**

Easy-to-use pearl form

ABWAX® Rhus Berry

Features

INCI	Rhus Verniciflua Peel Cera
APPEARANCE	Solid in pearls
COLOR	White to pale yellow
ODOR	Characteristic
DROP POINT (°C)	49-56

- TEXTURIZING PROPERTIES
- SMOOTHNESS IMPROVING AGENT
- 100% PLANT-DERIVED WAX
- HIGH STABILITY TO TEMPERATURE VARIATIONS
- LOW-MELTING POINT

Background

The ABWAX® VIRIDIS line is a line of waxes for cosmetic applications developed to create **sustainable alternatives to classic natural waxes**.

ABWAX® RHUS BERRY WAX comes from sustainable and renewable resources through an ethical and transparent supply chain; in particular ABWAX® RHUS BERRY WAX derives from a plant of Asian origin, thus applying the concept of using **100% of the available resources**.

General information

ABWAX® RHUS BERRY is a wax of **vegetable origin** characterized by a **low melting point**: the data show a range between 49 and 56° C.

It is also very stable to temperature variations, having a moderate oil crosslinking capacity.

All these points allow for anhydrous stick systems, for example, the creation of **unique performances** by combining ABWAX® RHUS BERRY WAX with other waxes: as internal tests have shown, this combination **increases the smoothness** and yield of the finished product.

Easy to use in its pearl form, ABWAX® RHUS BERRY WAX works in combination with all common cosmetic ingredients, **improving the finish and texture** as well as the smoothness of the product.

ABWAX® RHUS BERRY WAX is also exempt from REACH registration, thanks to its completely natural components. ABWAX® RHUS BERRY has been tested in different types of cosmetic formulations.
